When enabled by manufacturers, the chipset supports Intel® Graphics Media Accelerator 900, PCI Express*, DDR2 400-MHz system memory and Intel® High Definition Audio.. Mobile Intel® 915GM Express chipset is a component of Intel® Centrino® processor technology, designed in tandem with Intel® Pentium® M processor to deliver exciting new usage models.. Mobile Intel® 915GMS Express Chipset Mobile Intel® 910GMS Express chipset is a component of Intel® Centrino® processor technology, designed in tandem with Intel® Pentium® M processor to deliver exciting new usage models.

Additionally Mobile Intel® 915GM Express chipset supports up to 2 GB of DDR2 system memory which enables up to 60% increase in peak memory bandwidth and power benefits over DDR memory and PCI Express* bus architecture, a highly scalable general purpose I/O for industry peripherals such as ExpressCard*.. Other features include DDR2 memory, Intel® High Definition Audio, Serial ATA and ExpressCard.. When enabled by manufacturers, Intel® 915GMS supports Intel® Graphics Media Accelerator 900 and next generation features such as DDR2 memory, SATA, PCI Express*, Intel® High Definition Audio and ExpressCard*.. Mobile Intel® 915GM Express ChipsetFeaturing the Intel® Graphics Media Accelerator 900, the Mobile Intel® 915GM chipset enables 2x the graphics performance of the previous generation of platforms based on the Intel® 855GME chipset. Mobile Intel® 915GM/PM/GMS & 910GML Express Chipset FamilyThe Mobile Intel® 915GM/PM/GMS and 910GML

Express chipset family is a graphics memory controller hub (GMCH) designed for use with 90nm process technology based Intel® Pentium® M Processors (containing 2 MB L2 Cache) and Intel® Celeron® M processors.. When enabled by manufacturers, Intel® 915PM Express chipset supports PCI Express* based graphics only.. When enabled by system manufacturers, Intel® 915GM supports Intel® Graphics Media Accelerator, PCI Express* based graphics, Intel® High Definition Audio, Serial ATA and DDR2 memory.
